SUMMARY

Third-year dual-degree student at VNUHCM-UIT seeking a Software Engineer Internship, with a strong interest in backend and fullstack development. Skilled in C#, Python, .NET, FastAPI, and database design, with hands-on experience building RESTful APIs, management systems, and AI-assisted applications. Proven ability to implement end-to-end features, work effectively in teams, and adapt quickly to new technologies in project-based environments.

ACADEMIC BACKGROUND

VNUHCM - University of Information Technology
B.Sc. student in Information Systems & Computer Science
Current GPA: 3.2/4.0

Oct 2023 – Now

COMPETITIONS & AWARDS

4th Place , SEAPP 2025 - University Competition	Dec 2025
Honorable Mention , ICPC Vietnam National Round - Informatics Olympiad - National	Nov 2025
Honorable Mention , ICPC Vietnam National Round - Informatics Olympiad - National	Sept 2024

SKILLS

Programming Languages:	C++, C#, Python, TypeScript
Frameworks & Libraries:	.NET, FastAPI, React, Tailwind CSS, Flutter
Database:	PostgreSQL, SQL Server, MySQL, SQLite, MongoDB
Tools & Version Control:	Git, GitHub, Jira, Figma, Notion, Jupyter, Vite
Soft Skills:	Teamwork, Planning, Communication, Problem Solving, Adaptability
Languages:	Vietnamese (native speaker), English (fluent, 6.5 IELTS)

PROJECTS

InsureAssist - AI-Powered Vehicle Insurance Claim Assistant Mar 2026 – Mar 2026
URL: [github.com/AdamNbz/LotusHacks](#)

- Built an AI-assisted vehicle insurance claim intake system for the Vietnam market within 36 hours straight, enabling users to report incidents, receive claim triage, and prepare insurer-specific claim documents through a guided end-to-end workflow.
- Technologies:** Python, FastAPI, React, TypeScript, Vite, Tailwind CSS, MongoDB, OpenAI API, Zilliz.
- Role:** Fullstack Developer; contributed to both frontend and backend development for the claim intake flow, user/admin interfaces, and API-driven claim processing features in a hackathon team environment.

eUIT - University Student Information System Nov 2025 – Dec 2025
URL: [github.com/AdamNbz/eUIT—SE-APP-2025](#)

- Built a university student information system that supports student information lookup and service-related workflows, helping users access academic information and interact with campus services in one application.
- Technologies:** C#, .NET 9, RESTful APIs, SignalR, Flutter.
- Role:** Fullstack Developer; implemented backend APIs in .NET, handled API logic for core modules, and integrated API endpoints into the application GUI to ensure smooth end-to-end functionality.

Student Management Application Feb 2025 – Jun 2025
URL: [github.com/AdamNbz/SE104](#)

- Developed a student management application to manage student records and core academic workflows through structured CRUD operations and a consistent data model.
- Technologies:** C#, .NET, EF Core, SQLite.
- Role:** Team Leader, Backend Developer; designed the SQLite database, implemented API and data-access layers with .NET and EF Core, and coordinated teammates throughout the project lifecycle.

Sport Venue Booking Management Dec 2024 – Jan 2025
URL: [https://github.com/AdamNbz/IT008](#)

- Built a sport venue booking management system for handling venue information, booking requests, and schedule management, providing users with a streamlined booking workflow.
- Technologies:** C#, .NET.
- Role:** Team Leader, Fullstack Developer; developed both backend logic and frontend screens entirely in .NET/C#, designed the user interface in Visual Studio, and directed teammates in planning and completing the project.

ACTIVITIES

UIT GamApp Studios Club | Member
Member of the Development Team; gained Game & Software development experiences, as well as improved teamwork & communication skills. Oct 2024 – Now
